Stainless Steel Sterilisation Tube

Order # Steritube-25

Description:
• Durable design 304 Stainless Steel
• Durable Electro Polish
• Silicone Caps both ends
• Overall length with caps in place 66cm
• Overall length without caps 64cm
• Holds pins up to 61cm long
• Inside diameter 1.6cm

Benefits:
• Compatible with all sterilisation procedures
• Provides excellent drainage in tube
• Silicone plug provides protection for bone pin tips
• Access to tube from both ends
• Easily removable end caps
• High heat resistant medical grade plugs allow for safer handling
• Easily remove end caps
Scope Lens Cleaning Kit

Order # 45-8400

Scope Lens Cleaning Kit
Includes:
• Spectra-Lens™ optical lens cleaning solution
• Foam-tip swab cleaning brushes 4mm (3 each)

ScopePak®

Engineered protection for your rigid Endoscopes
• Proven protection - helps prevent damage to endoscopes, minimising expensive repairs
• Secure - endoscopes are fixed in place with unique silicone holding bars
• Flexible - adjustable silicone holding bars accommodate a variety of endoscope sizes
• Durable - engineered with tough, time-tested, highly resilient plastic polymers to withstand the rigors of repeated use and sterilisation
• Convenient - transparent lid allows easy identification of endoscopes

- Freer Elevator
- Gigli Wire Saw 30.5cm
- Gigli Wire Saw Handles (set of 2)
- Bipolar Cord

*Completely disposable*
A Few Words on Wire Brushes...

The stainless steel brush is designed to remove baked-on debris and stains that the nylon brush cannot remove. The design of the soft stainless steel bristles allows the bristles to bend and remove debris automatically.

The original wire brushes that damaged surgical instruments were bone cement brushes. These stiff, traumatic bristles occasionally caused damage, which led to the negative opinion of wire brushes.

The recommendation is to use a nylon bristle brush first, if the debris is not removed, then use a stainless steel brush. The designed usage of this stainless wire brush is bone files, needle holder jaws, burrs, reamers, vascular serrations, and stubborn stains.

Please contact your surgical instrument manufacturer before using wire brushes.
Acetabular Brushes

Order # 45-755  Made with Anti-Microbial Nylon Bristles

Double-Ended Acetabular Reamer Cleaning Brush
16.5cm length.
Circular brush end: 44mm diameter, straight end: 8mm diameter

For Hard to Clean Instruments - Stiff-Line™

Stiff-Line™ Brushes have been designed with extra stiff medical-grade nylon bristles that allow for aggressive cleaning. Also incorporated in the design are thicker more rigid shafts to prevent bending. The shafts are made from surgical grade stainless steel, making the bristles reusable. 46cm long, pack of 3

All stringers are 1 per pack, except the Bunt Ring #22-8251, which contains 6 per pack.

### Decontamination Stringers

Wider design exposes the area of the instrument most important to decontamination. Keeps instruments organised and promotes safe handling:

- New 12.7 cm width
- Opens instruments wider
- Better cleaning
- Reduces staining
- Keeps ratchets open

<table>

How to Clean a Cleaning Brush

1. Soak brush in a disinfectant solution
2. Place in an ultrasonic cleaning machine for several minutes
3. When brushes are soiled, discard

Remember:
- Brushes only assist in the cleaning process
- Brushes should only be used in decontamination
- Brushes should never be used ON or IN the human body

Note: Cleaning brushes should be decontaminated at least daily

Yellow Testing Material. For testing scissors shorter than 11.4cm. Latex-Free

Sharpness Test Standards Kit

The perfect kit for testing surgical instruments for proper sharpness.
The Sharpness Test Standards Kit includes easy-to-understand instructions, all sharpness testing materials and full-colour photographs illustrating everything you need to know about testing.

Nesting I.V. Stand

The unique nesting design of the SmartStack™ means you can now store stands in half the space of traditional designs, making your facility neater and safer. This is a real bonus in those cramped patient care areas when multiple poles are called for!
The SmartStack™ base is 100% cast aluminum with 5 symmetrically placed casters for extra support, durability and overall easy maneuvering

- Space saving design
- Large, smooth rolling casters (2 locking)
- 100% cast aluminum base
- Adjustable height
- 4 ram-horn hooks (2 fixed, 2 removable)
- Powder-coat paint finish
